- Tolerant of most soil types

Plant Type: Annual
Height Category: Tall
Garden Height: 24 - 40 Inches
Spacing: 18 - 24 Inches
Spread: 18 - 36 Inches
Foliage Colors: Yellow
Foliage Shade: Chartreuse w/red
veins
Habit: Upright
Container Role: Thriller

2" POT - \$3

COLEUS 'GOLDEN DREAMS'

PLANT NEEDS

Light Requirement: Sun or Shade
Maintenance Category: Easy
Bloom Time: Grown for Foliage
Hardiness Zones: 10a, 10b, 11a,
11b
Water Category: Average
Soil Fertility Requirement:
Average Soil
Uses: Border Plant, Container
Landscape, Mass Planting

USES NOTES:

Great in both landscapes and containers. It performs well in both sun and shade.

MAINTENANCE NOTES:

Many people feel that coleus look best before they flower. We have worked hard to choose coleus that bloom late in the season or not at all. To keep foliage in top shape, pinch off the blooms as they appear if you wish.

Plant Type: Annual
Height Category: Tall
Garden Height: 24 - 40 Inches
Spacing: 18 - 24 Inches
Spread: 18 - 36 Inches
Foliage Colors: Orange
Foliage Shade: Copper-orange
Habit: Upright
Container Role: Thriller

2" POT - \$3

COLEUS 'SEDONA SUNSET'

PLANT NEEDS

Light Requirement: Sun or Shade
Maintenance Category: Easy
Bloom Time: Grown for Foliage
Hardiness Zones: 10a, 10b, 11a,
11b
Water Category: Average
Soil Fertility Requirement:
Average Soil
Uses: Border Plant, Container
Landscape, Mass Planting

USES NOTES:

Great in both landscapes and containers. It performs well in both sun and shade.

MAINTENANCE NOTES:

Many people feel that coleus look best before they flower. We have worked hard to choose coleus that bloom late in the season or not at all. To keep foliage in top shape, pinch off the blooms as they appear if you wish.

CYPRUS 'PRINCE TUT'

PLANT NEEDS

Light Requirement: Part Sun to Sun

Maintenance Category: Easy

Bloom Time: Grown for Foliage

Hardiness Zones: 10a, 10b, 11a, 11b

Water Category: Average

Soil Fertility Requirement:
Average Soil

Uses: Container

Landscape, Mass Planting,
Specimen

USES NOTES:

Use in larger containers alone and as a thriller in large combinations. Great in the landscape, where it is best with consistent moisture.

MAINTENANCE NOTES:

Cyperus Papyrus is not hardy enough to survive winters with freezing temperatures and it is not a candidate to overwinter inside. It is a very fast grower and will quickly grow to impressive size when replanted in the spring.

Plant Type: Annual
Height Category: Tall
Garden Height: 18 - 30 Inches
Spacing: 18 - 24 Inches
Spread: 24 - 36 Inches
Foliage Colors: Green
Foliage Shade: Green
Habit: Upright
Container Role: Thriller

2" POT - \$3

DAHLIA 'GRANDE COZUMEL'

Plant Type: Annual

Garden Height: 24 - 30 Inches
Spacing: 24 - 30 Inches
Spread: 18 - 2 Inches
Flower Colors: Pink
Foliage Colors: Pink
Multicolored
Habit: Upright
Container Role: Thriller

PLANT NEEDS

Light Requirement: Sun
Maintenance Category: Easy
Bloom Time: Grown for Foliage
Hardiness Zones: 9a, 9b, 10a,
10b, 11a, 11b
Water Category: Average
Soil Fertility Requirement:
Average Soil
Uses: Container, Cut Flower,
Grass, Landscape

USES NOTES:

Great in beds, along walkways,
and on patios.

MAINTENANCE NOTES:

In almost all areas it will be an annual grass. Where temperatures get colder than 20 degrees F, the plants should be treated as annuals. Once the grass turns brown it can either be removed immediately or removed in the spring. It should not be expected to live through the winter and begin growing again in the spring.

4" POT - \$4

GRACEFUL GRASS 'VERTIGO'

USES NOTES:

This grass will beautify your garden all summer.

PLANT NEEDS

Light Requirement: Sun

Maintenance Category: Easy

Bloom Time: Grown for Foliage

Hardiness Zones: 8a, 8b, 9a, 9b,
10a, 10b, 11a, 11b

SUPERTUNIA
'VISTA BUBBLEGUM'

Plant Type: Annual
Height Category: Medium
Garden Height: 12 - 24 Inches
Trails Up To: 36 Inches
Spacing: 18 - 32 Inches
Spread: 24 - 36 Inches
Flower Colors: Pink
Foliage Shade: Green
Habit: Mounding, Trailing
Container Role: Filler

PLANT NEEDS
Light Requirement: Part Sun to Sun
Maintenance Category: Easy
Bloom Time: Planting to Hard Frost
Hardiness Zones: 10a, 10b, 11a, 11b
Water Category: Average
Soil Fertility Requirement: Average Soil
Uses: Container, Landscape, Mass Planting

MAINTENANCE NOTES:
No deadheading necessary.
After purchase, top dress with slow-release fertilizer. Fertilize every two weeks in May with water soluble fertilizer when watering. In June begin once per week. If very hot weather, fertilize every third watering. In July, top dress again with slow-release fertilizer. At the same time, trim back some of the longer branches just enough to bring the plant back in line with the bottom of the pot or basket, no more than 20% of the plant. Water every other day, fertilize every other watering throughout August. May trim the plant again in August. Will not need to water as frequently in Sept.

4" POT - \$4

SUPERTUNIA

'TRAILING STRAWBERRY PINK VEINED'

Plant Type: Annual
Height Category: Short
Garden Height: 4 - 8 Inches
Trails Up To: 36 Inches
Spacing: 12 - 18 Inches
Spread: 24 - 36 Inches
Flower Colors: Pink
Foliage Shade: Green
Habit: Mounding, Trailing
Container Role: Spiller

PLANT NEEDS

Light Requirement: Part Sun to Sun
Maintenance Category: Easy
Bloom Time: Planting to Hard Frost
Hardiness Zones: 10a, 10b, 11a, 11b
Water Category: Average
Uses: Container, Edging Plant, Ground Cover, Landscape, Mass Planting

USES NOTES:

Supertunia Trailing petunias are very strongly trailing, with very little height. They will function as spillers in containers, but are also good as front-of-the-bed plants for landscapes. If your goal for hanging baskets or window boxes is to have the plants be as long as possible, Supertunia Trailing is the best choice. They have small flowers.

MAINTENANCE NOTES:

See Supertunia 'Vista Bubblegum' for water/fertilizer instructions.

4" POT - \$4

SWEET POTATO VINE

'GREEN WITH ENVY'

Plant Type: Annual
Height Category: Short
Garden Height: 10 - 16 Inches
Trails Up To: 28 Inches
Spacing: 12 - 18 Inches
Spread: 18 - 30 Inches
Flower Colors: none
Foliage Shade: Lime Green
Habit: Mounding, Trailing
Container Role: Filler

PLANT NEEDS

Light Requirement: Part Sun to Sun
Maintenance Category: Easy
Bloom Time: Grown for Foliage
Hardiness Zones: 11a, 11b
Water Category: Average
Uses: Border Plant, Container, Edging Plant, Landscape, Mass Planting

USES NOTES:

Works great in landscapes as an annual ground cover, as well as in combinations and containers by themselves. The plant is very adaptable, working in both sun and shade conditions, although the colors are deeper and brighter in full sun.

MAINTENANCE NOTES:

In combination planters the vine can sometimes overwhelm less vigorous plants. If you prefer to keep a more balanced look to your combination planters, cut back or remove stems at any time.

4" POT - \$4

SWEET POTATO VINE 'BLACKIE'

PLANT NEEDS

Light Requirement: Part Sun to Sun

Maintenance Category: Easy

Bloom Time: Grown for Foliage

Hardiness Zones: 11a, 11b

Water Category: Average

Uses: Container, Landscape

USES NOTES:

Use in hanging baskets, beds, borders and window boxes

MAINTENANCE NOTES:

In combination planters, the vine can sometimes overwhelm less vigorous plants. If you prefer to keep a more balanced look to your combination planters, cut back or remove stems at any time.

Plant Type: Annual

Height Category: Short

Garden Height: 4 - 10 Inches

Trails Up To: 72 Inches

Spacing: 18 - 24 Inches

Spread: 48 - 60 Inches

Flower Colors: none

Foliage Shade: Purple/Black

Habit: Trailing

Container Role: Spiller

PEPPER CALIFORNIA WONDER

75 days

Certain to become your favorite bell pepper, California Wonder is a heavy-bearing, disease-resistant, vigorous plant that will bring you a summer full of delicious eating!

These peppers are thick-walled and blocky, about 4 inches tall and wide, with a crisp, mild flavor and terrific sweetness. They mature from green to red on the plant, and are ideal for stuffing, slicing into rings for dips and salad toppings, and chopping into crisp bite-sized nibbles. Expect a big harvest from these vigorous plants, which reach 28 to 30 inches high.

Part of the secret of California Wonder's success is its resistance to Tobacco Mosaic Virus, which keeps the foliage healthy and strong all season long. You can't go wrong with this trusted favorite!

SINGLE-\$2

4PK-\$3

PEPPER CANDY CANE

75 days

Eye-catching variegated foliage and fruit that ripen from green striped to solid red make this pepper very unique. Candy Cane Red's medium sized plants produce high yields of cone shaped fruits that are 1 $\frac{3}{4}$ "W x 3 $\frac{3}{4}$ "L at the crown. The sweet flavor, thin walls, and crisp texture make this pepper perfect for fresh eating at any stage of ripeness.

SINGLE-\$2

4PK-\$3

PEPPER JALEPENO WHOPPER

72 days

Meet the newest Whopper -- a highly productive, easy to grow, absolutely delicious jalapeno that stands up to just about any disease Mother Nature can throw its way! If you like hot peppers, or if you just want a great natural pest repellent in the garden, Park's Whopper Jalapeno is the one to grow!

This is the pungent little dark green pepper found in rings atop nachos and chopped in Mexican sauces. Very popular fresh, canned, or pickled, it livens up any dish!

Weighing in at 1.8-2.6 oz. each, these peppers pack 2100 to 2500 Scovilles of heat! You will love them straight from the vine as well as prepared in a variety of ways. And best of all, the plants are highly resistant to most pepper diseases, especially Potato Virus UY, Tomato Etch Virus, canker stem, and root rot (Phytophthora).

SINGLE-\$2

4PK-\$3

PEPPER KARMA

68 days

Early on, Karma got top ratings for its heavy yield, large 6- by 4-inch shape, showy dark-green-to-bright-red color, and thick walls. But every gardener knows that the 3 most important criteria for vegetables are taste, taste, and taste. So when the raves began pouring in from taste tests, we proclaimed Karma "the new standard of excellence in bell peppers."

These TMV-resistant plants reach 25 to 35 inches tall and need staking to support their huge bounty. Scrumptious juicy, sweet flavor with no aftertaste!

SINGLE-\$2 4PK-\$3

PEPPER SWEET BANANA

75 days.

Named for its banana-like shape, this variety bears sweet, mild banana peppers that mature from yellow, to orange, and then to crimson red. Plants fruit prolifically, easily producing up to 25 to 30 pods per plant. Banana peppers are great for frying and pickling, and are an excellent choice for making pepper rings for sandwiches. Great for containers.

SINGLE-\$2 4PK-\$3

TOMATO BIG RAINBOW

90 days. Indeterminate.

A joy to grow as well as to eat, this exciting heirloom is over the top in color, size, vigor, and flavor. When you want a really exceptional tomato, choose Big Rainbow!

The fruit eventually reaches about 2 pounds, but when young it is striped like an upside-down traffic signal -- green shoulders, yellow belly, and red underside and blossom scar. As it matures, the green disappears and the red flushes upward through the yellow, until the ripened tomato is a rich gold with heavy red striping. Cut it open and this play of colors continues, for unparalleled plate appeal! Find a very sturdy support for this tomato -- it's going to tip the scales when in full fruit!

SINGLE-\$2

4PK-\$3

TOMATO CELEBRITY HYBRID

70 days. Determinate

An AAS winner and long-time favorite, Celebrity is a superior all-around tomato with such fantastic disease resistance you can put away the sprays and soaps for good!

These determinate plants are exceptionally strong, bearing masses of smooth, round, bright red tomatoes. Weighing about 8 ounces, they're very uniform (no green shoulders here!) and resistant to cracking.

Boasting a fantastic disease resistance package, Celebrity is resistant to, or tolerant of, the following tomato diseases: Verticillium Wilt, Fusarium Wilt races 1 and 2, Nematodes, and Tobacco Mosaic Virus. VF1F2N-TAS.

SINGLE-\$2

4PK-\$3

TOMATO RUTGERS

74 days. Indeterminate. Heirloom

The legendary Jersey tomato, introduced in 1934, is a cross between J.T.D. (an old New Jersey variety from the Campbell Soup Co.) and Marglobe. Its flavor, both for slicing and cooking, is still unequaled. Red fruits are slightly flattened. Tall vines, Fusarium resistance. The plant is an indeterminate grower that typically does not grow higher than around 36".

SINGLE-\$2

4PK-\$3

TOMATO SUPERSWEET 100

65 days. Indeterminate

With extra sweetness and better disease-fighting ability than the beloved classic, Sweet 100, Supersweet 100 Hybrid is a rare treat that is also one of the most nutritious tomatoes available anywhere!

With the same great flavor that made its predecessor a standard garden favorite for many years, Supersweet 100 also has a higher vitamin C content than any other tomato. The bright red, 1-inch globes are amazingly sweet, and arise prolifically.
