

WATER POLLUTION CONTROL

Re: W 3rd Ave Sewer Replacement Project

August 7, 2019

Dear Resident,

In our continuing effort to serve our community, the City would like to provide you with this notice that starting August 20, 2019, weather permitting, crews from Vanderpool Construction will be performing sewer replacement work near your residence.

The City of Indianola has hired Vanderpool Construction to replace the sanitary sewer, 3 service laterals to back of curb, and the street near your residence. The existing 6" clay sanitary sewer will be replaced with an 8" PVC sewer. The new sewer will improve the collection system in this area by reducing the Inflow and Infiltration (I&I).

Tentative Time Line:

Road closure is scheduled to begin on August 20th. The closure will include the intersection of West 3rd Avenue and F Street extending west to mid-way between G Street and F Street.

Anticipated completion of the sanitary sewer portion of work is September 6th.

Anticipated completion of roadway paving, surface restoration and subsequent road opening scheduled for October 4th.

We understand that this work may present a short-term inconvenience. Please know that we will do our best to minimize any impact this necessary work may have on your neighborhood. Thank you for your patience and understanding.

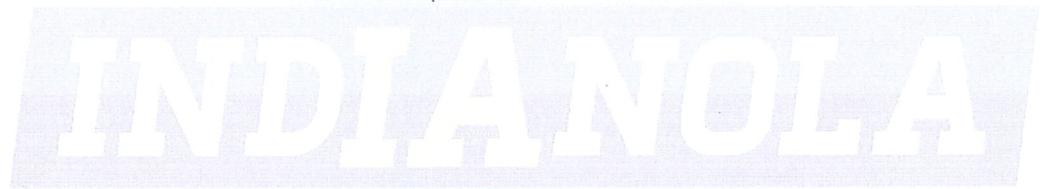

Contacts should you have any questions or concerns:

Jamie Crubaugh, Vanderpool Construction, 515-961-4682

Rick Graves, City of Indianola, 515-962-5284

Sincerely,

Rick Graves
WPC Supt.
City of Indianola
