

PERMANENT AND STORED LPG PERMIT APPLICATION

An annual inspection is required for the installation, storage, handling, and use of LPG in conformance with Chapter 61 of the 2018 International Fire Code (IFC). An exception not requiring a inspection is for permanently installed containers with 1000-gallons or less serving one-two family dwellings, use of LPG for gas grills, less than 500-galons for a tank or an aggregate total of less than 1000-pounds for individual containers for temporary installations and the operation of cargo tankers that transport LPG.

Obtaining the inspection/permit is the responsibility of the owner and/or the general contractor. The tank(s) and line(s) must be protected by an approved means at all times. Permanent and tank(s) awaiting resale shall be protected per section 312 of the 2018 IFC. Temporary tanks, 500 gallons or greater, used for construction purposes shall be visually protected by wrapping the tank and lines with orange snow fence. This fence must be secured at all times either scaffolding placed around the tank(s) and line(s) or by fence posts. Other means of protection shall be approved by the Fire Marshal. Empty tanks shall be considered full until removed from the premises. After installation, tanks must be protected as above before any refill is allowed. Tanks 500-gallons or greater, shall be set and/or moved only under the direct supervision of the LPG dealer. Violation of any part of this permit is subject to a fine as listed in Chapter 4 of the City of Indianola Code of ordinances.

Please fill out the form below and submit payment using this [link](#) when selecting the description under payment details please select other then add a description of “LPG Permit Application and your address” or mail a check to the address below. **No inspections will take place without payment.** The permit fee is \$50 per site.
