AGENDA

- How We Got Here
- Radio System Statement of Work Spec
- System Design Overview – 2 Options
- Coverage Maps
- Warranty, Maintenance and Ongoing Support
- Pricing
- Emergency School Radios
- Budgetary Pricing vs Statement of Work Scope
How we got here

- Legacy VHF 911 Communication infrastructure continually failing
- Past FCC Narrow-banding negatively impacted VHF radio coverage
- Over time several larger public safety agencies within the county start upgrading mobile & portable radios to Motorola APX Dual Band subscribers allowing for use on current VHF system and future-proofing for 700/800 MHz channels
- Consultant hired to complete a radio communication needs analysis - Phase 1
- Consultant contracted to assist in writing spec and put RFP out for new radio system - Phase 2
- New Courthouse / Jail vote passes in 2018 forcing move of current PSAP
- New Motorola MCC7500 consoles are purchased and installed at temporary PSAP location at the County Admin Building
- The new consoles are directly connected through ICN Fiber to ISICS master cores allowing for immediate use of the ISICS mobile coverage provided by the Statewide system

How we got here

- Decision is made to change consultant Phase 2 scope from RFP spec to SoW for Motorola due to desire to be on the Statewide system and money already spend with Motorola going that direction
- Simpson Law Repeater goes down leaving County law enforcement without 911 communications
- Move to ISICS 700 MHz channels because mobile coverage is already in Warren County, new consoles already directly connected to ISICS cores and several law enforcement agencies have Motorola 700 MHz TDMA capable radios
- EMA Commission votes to move forward with getting New county-wide infrastructure project moving. SoW is provided to Motorola.
- Motorola presents 2 coverage designs and related costs for EMA Commission to decide what they will present to BoS
Warren County’s Statement of Work

List of major spec items:

- Portable on-street coverage
- In-Building coverage in Schools
- 5 Channel Simulcast Design
- Microwave Backhaul
- VHF Paging
- Training
- Logging Recorder Upgrade
- DC Power Back-Up
- Network Management and Alarming

7 Site Design – Statement of Work Specification
Solution Overview

- 97% On-Street Portable Countywide
- In-Building Coverage where schools are located
- Countywide paging needed using current pagers
- System Coverage Testing when completed to guarantee coverage

System Design

- 97% Portable on Street
- In Building coverage at school locations
- 7 Transmit Receive Sites
  - 5 Greenfield Towers - Lacona, Norwalk, New Virginia, Martensdale, Indianola
  - Existing Towers - Murphy Tower, Hooper ISICS site
  - Prime site located at Hooper ISICS
  - New Shelters at 6 sites to house new equipment
- 5 Channel 7/800 MHz TDMA Simulcast
- 1 VHF GTR 8000 and Antenna Assembly at every site for VHF paging
- DC Power and Battery Plant backup
- Upgraded Audio Logging
- Redundant Aviat Microwave backhaul
  - Ring configuration throughout the county except Indianola which utilizes a redundant link
6 Site Design – Portable on Street Specification
Solution Overview

- 95% On-Street Portable Countywide Coverage
- No requirement for In-Building Coverage where schools are located
- Other requirements of SOW remain the same

System Design

- 95% Portable on Street
- 6 Transmit Receive Sites
  - 4 Greenfield Towers - Lacona, Norwalk, New Virginia, Indianola
  - Existing Towers - Murphy Tower, Hooper ISICS site
  - Prime site located at Hooper ISICS
  - New Shelters at 5 sites to house new equipment
  - Martensdale tower removed
- 5 Channel 7/800 MHz TDMA Simulcast
- 1 VHF GTR 8000 and Antenna Assembly at every site for VHF paging
- DC Power and Battery Plant backup
- Upgraded Audio Logging
- Redundant Aviat Microwave backhaul
  - Ring configuration throughout the county except Indianola which utilizes a redundant link
  - Ring now links into Ewing rather than Madison
6 Site – In Building Coverage

6 Site - Paging Coverage
WARRANTY, MAINTENANCE, AND UPGRADES
Service, Maintenance and Upgrades

The proposed offering consists of the following specific services:

- Service Desk
- Technical Support
- Network Event Monitoring
- Onsite Support
- Annual Preventative Maintenance
- Network Hardware Repair with Advanced Replacement
- Remote Security Patch Installation
- Network Updates (SUAll)

Local Service Provider

Electronic Engineering

- Motorola Solutions P25 Certified Service Center
- Local to Warren County
- Radio and Communications since 1946
- Expertise in installing equipment, highly trained technicians also travel onsite to install radios, base stations, repeaters, consoles and other communications equipment
- Will manage system with Motorola Customer Service Manager post-warranty period and be an integral part of implementation
